

Empowering public sector through AI: Lidingö Stad

In an era where transparency and inclusivity are paramount, this story delves into the transformative potential of AI in public sector use cases as it provides citizens and journalists "Right To Access", by ensuring compliance with Sweden's transparency and accessibility laws and regulations. From this lense the municipality Lidingö stad is sharing input from two projects; the Masking service and "Digital Accessibility" project conducted over the last twelve months. Tune in to learn how AI can uphold democratic processes and furthermore about the legal imperatives for equal opportunities and the challenges of crafting comprehensive legislation.
